hygger Misty Air Bubbler Kit

HG157-6CM

HG157-9CM

HG157-12CM

hygger Misty Air Bubbler Kit is the perfect choice for supplying oxygen to freshwater and seawater aquariums and ponds.

Precautions:

1. Before use, please soak the air stone for more than 30 minutes for more uniform and finer bubbles.
2. Please select an air pump with suitable air volume and output for use with the air stone. (The air pump is not included in the scope of delivery)
3. Place the air stone in the water after connecting it and repeatedly disconnect and reconnect the air tube to quickly achieve a fogging effect due to the backflow in the air tube.
4. It is recommended to clean the air stone every two months to prevent clogging and maintain good dissolved oxygen performance.
5. This air stone is suitable for both freshwater and saltwater aquariums.

1. PRODUCT FEATURES

1. High-density pores, fine bubbles, quiet operation, no sleep disturbance.
2. The air stone contains iron and epoxy for added weight, designed for stable and secure placement.
3. The air stone features a hidden air inlet for aesthetic sleekness.
4. Aesthetically enhanced: Air enters the air stone, and the top and bottom covers compress the sponge to produce fine bubbles that are expelled through the gap between the top cover and the opening.
5. Easy to clean.
